

PPE BREAKDOWN

Hood

Particulate-blocking hoods should have a PFE of 90% or greater.

Helmet

The helmet's chin strap should always be tight with ear flaps down to ensure a snug fit.

Facepiece

No skin should be exposed between the hood and facepiece.

SCBA

SCBA should always be worn in the presence of smoke, heat, or toxic gases – IDLH – including overhaul.

Flashlight

A hands-free flashlight helps improve visibility and situational awareness while keeping hands available for other functions.

Radio

The radio should be properly clipped and not dangling allowing for quick access.

Turnout Coat & Pants

Gear that fits properly will be better able to protect you. Take care to ensure you and your members have turnout gear that fits.

Gloves

Gloves should be worn to protect the hands from burns, cuts, and abrasions.

Boots

Make sure your boots comply with NFPA 1970.

The PPE ensemble should meet the NFPA 1970 Standard.

HOT TIP

Protect your crew and community by properly wearing, cleaning and storing your PPE gear.
